1.Opis funkcionalnosti

- Meni je dinamički, povlači se iz baze.
- Admin može da upravlja korisnicima, postovima, slikama. Slike ubacene imaju svoja pravila preko kojih je dozvoljen format slike i ekstenzija, što je urađeno preko codeigniter koda.
- Logovanje se štiti sesijama i admin može da vidi svoje postove, takodje ulogovani kao korisnik može da preko izbora u gornjoj navigaciji, "Profil", izvrši promene na svom profilu.
- Korpa je urađena preko koda i post tj izabrani proizvod se prenosi preko id uzetog iz url-a.
- Template je preuzet sa interneta i izvršene su izmene na css-u da bi dobio završni izgled.
- jQuery je koriscen na pocetnoj strani za dropdown meni.

The screenshot shows a web application interface for 'SHOP CART'. At the top, there are social media icons for Twitter, Facebook, YouTube, and Tumblr. A shopping cart icon labeled 'Korpa' is in the top right. Below the site logo, a navigation bar contains links for 'Početna', 'Proizvodi', 'Registracija', and 'Autor'. A 'Login' link is on the right. The 'Registracija' section is active, displaying a form titled 'Podaci o korisniku'. The form includes input fields for 'Ime:', 'Prezime:', 'Username:', 'Lozinka:', 'Lozinka ponovo:', and 'Email:'. An orange 'Prijavi' button is at the bottom of the form. A black footer bar is at the bottom, with 'Acti' and 'Go to' visible on the right.
